JavaScript – Implicit Type Coercison

Practice Problems

Answer the following questions <u>WITHOUT</u> executing the code in Codepen. Also, explain why do you think your answer is correct.

Q1. What will be printed in the console?

1. console.log(true + false)

2. console.log(12 / "6")

3. console.log("number" + 15 + 3)

4. console.log(15 + 3 + "number")

5. console.log(1 > null)

6. console.log("foo" + + "bar")

7. console.log('true' == true)

8. console.log(false == 'false')

9. console.log(null == '')

10. console.log(!!"false" == !!"true")
