JavaScript – Conditional Statement: switch

Practice Problems

Answer the following questions and run the code in Codepen.

Q1. Write a program to print the number of days in a month using a switch case. Change the value of *monthNumber* and check if your code works fine.

```
var monthNumber = 3;
```

Example:
>	monthNumber = 3
>
>	**Output:**
>	Month = March
>	Total number of days = 31

Q2. Write a program to check vowel or consonant using switch case. Change the value of *enteredAlphabet* and check if your code works fine.

```
var enteredAlphabet = 'd'
```

Example:
        enteredAlphabet: c

Output: 'c' is consonant

Q3. Write a program to check even or odd number using switch case. Change the value of *enteredNumber* and check if your code works fine.

```
var enteredNumber = 41
```

Example:
        enteredNumber: 41

Output: 41 is an odd number
